**Subject:** Stop Antibiotic abuse in livestock

Regarding Docket # 99P-0485

I am writing to urge the FDA to take immediate action to stop the use of antibiotics for livestock that are also used to treat humans. Overuse of antibiotics has been proven to weaken the effectiveness of the the drugs for improving health. Please mandate that antibiotics used for animals must be completely different than those used to treat humans.

Furthermore, if animals were treated humanely, with adequate space, fresh air and chemical free food, they would require less antibiotics and be more healthful and flavorful to eat.
